

## AAA Vape Savor POD – instructions for use

### Presentation

Savor from AAA Vape is a light, refillable POD device that, thanks to its dimensions, fits perfectly in your hand. Despite its dimensions, however, it has a built-in battery with a capacity of 700mAh, and the vaping from it is direct, without the need to press any button. With side air vents and smooth technology, it always provides you with a fully satisfying MTL and DTL vaping. POD cartridges are equipped with magnets, thanks to which they fit perfectly and easily in the right place. This device is therefore ideal not only for beginners but also for advanced vapers who want low weight from their new device with a satisfactory taste. You can count on AAA Vape to get the best for every moment of your life, captured in the smallest detail.

### Package contents

1x Savor device  
1x POD cartridge 1Ω dual coil  
1x POD cartridge 1.4Ω dual coil  
1x micro-USB cable  
1x Neck cord  
1x Instructions for use

### Properties

Dimensions: 93.5mm x 21.2mm x 11.5mm  
Weight: 27g  
Battery capacity: 700mAh  
Capacity for e-liquid: 1.75ml  
Working power: 3W -15W  
Working voltage: 3.3V -4.2V

### Protective elements

- against overheating
- against overcharging the battery
- against undercharging the battery
- against atomizer short circuit
- before excessive glow time

### Equipment operation

1. Removing the POD cartridge  
Pull the cartridge out of the top of the device.
2. Filling with e-liquid  
Pull the silicone filler cap out of the cartridge. Pour e-liquid into the filling hole using a dropper bottle. Insert the silicone cap back into the filling hole. When refilling a new cartridge, allow it to stand for at least 5 minutes before using it to allow the e-liquid to soak up sufficiently.
3. Inserting the POD cartridge and using it  
Insert the cartridge into the top of the device. The correct insertion is then indicated by the LED indicator flashing green three times. You can then start using the device.

### Device signalling

1. During vaping

When vaping, the LED indicator will light up according to the current state of charge of the battery.

2. Battery states

Green color - 100% -75%

Blue color - 74% -35%

Red color - <= 34%

### Signalling during charging

When charging starts, the LED indicator flashes red three times and then remains lit during charging. When fully charged, the indicator turns green and flashes three times.

*The average charging time is 60 minutes from fully discharged to a fully charged battery.*

### Customer service

We always strive to provide not only high-quality products but also excellent service. If you have any questions, please do not hesitate to contact us at [info@cannadorra.com](mailto:info@cannadorra.com).

### Warranty conditions

Please keep the verification code and receipt. As a manufacturer, we provide a warranty period of 180 days from the date of purchase (does not apply to cartridges). Our company is not liable for damages resulting from improper use. The warranty only covers malfunctions and manufacturing defects. We are also not responsible for the use of imitations.

### Product authenticity check

To verify the authenticity of the product, scan the QR code on the verification label or enter the 16-digit verification code under the protective layer at the bottom of the website [www.cannadorra.com](http://www.cannadorra.com) and the verification result will be displayed within a few seconds.
